Engr 694-06, Research Methods in CS
Course Development, Fall 2017

H. Conrad Cunningham

20 August 2017

History

This is a required course for PhD students in the Department of Computer and Information Science at the University of Mississippi. It is available to MS students. The faculty plans to offer the course every two or three semesters as long as there is a sufficient potential enrollment of PhD students.

Dr. H. Conrad Cunningham, Professor and Chair, developed and taught the first offering of the course in Spring 2013 as Engr 694-6. He taught a second, considerably revised version of the course in Spring 2014 as Engr 694-60. Dr. Philip Rhodes taught the course in Spring 2015. Cunningham again taught the course as Engr 694-60 in Spring 2016.

Dr. Cunningham is again teaching the course as Engr 694-6 in Fall 2017. He will use an approach similar to the Spring 2016 version but look for ways to update and enrich the experience for the students.
